

Portfolio

Presented By: Zill E Noor

About me:

I am Zill-e-Noor, a Textile Design student at the University of Sargodha. I am currently in my first semester and developing foundational skills in garment construction, fabric handling, and design exploration. My work focuses on learning the essentials of cutting, stitching, and creating simple textile concepts. I enjoy experimenting with forms, colors, and patterns through sketching and small practical projects. This portfolio presents my early progress, current abilities, and the creative direction I aim to grow in.

Personal Skills

Fabric Cutting & Handling

Skilled in marking, measuring, and cutting raw fabric with accuracy and control.

Sketching & Illustration

Proficient in creating garment sketches that explore silhouettes, proportions, and design variations.

Stitching Techniques

Capable of performing fundamental machine and hand stitches, focusing on neatness and consistency

Fabric Behavior Understanding

Familiar with how different fabrics drape, stretch, and respond during construction

My Projects:

Project 1:

What I learnt:

A vibrant mustard-yellow traditional outfit featuring a straight silhouette with subtle red embroidered detailing along the neckline, sleeves, and hem. The design blends simplicity with elegance, making it suitable for both casual and semi-formal occasions.

Project 2:

What I learnt:

In this project, I learned how to stitch printed fabric with proper pattern alignment and clean finishing. I also developed skills in attaching lace neatly and maintaining fit, balance, and comfort in a coordinated kurta-trouser set.

Project 3:

What I learned:

Through this project, I learned advanced stitching techniques and creative pattern placement, especially designing and finishing details on the neckline and sleeves. This outfit enhanced my skills in fabric handling, symmetry, and adding handcrafted design elements to elevate a simple silhouette.

Project 4:

What I learned:

Through this fashion illustration, I developed my skills in depicting layered garment construction and creating depth through tiered ruffles. I learned to balance color harmony using soft pastels while practicing techniques for rendering flowing fabric and dimensional dress silhouettes.

Project 5:

What I learned:

This fashion sketch taught me to work with color blocking and contrasting panels to create visual interest and a slimming silhouette. I developed skills in rendering embellished details on the lapel collar and practiced depicting how vertical seam lines can enhance the design's structure and flow

Project 6:

What I learned:

This sketch helped me explore creating volume and movement in a full ball gown silhouette while mastering the technique of showing gathered fabric at the waistline. I practiced rendering flowing fabric folds and developed my color shading skills to convey depth and dimension in the dramatic skirt

Project 7:

What I learned:

This sketch challenged me to render a complex oversized bow statement piece with multiple fabric layers and folds, while learning to depict how structured elements create dramatic focal points. I practiced illustrating delicate embellishments and developed my technique for showing contrast between voluminous bow details and the sleek, fitted silhouette beneath

Project 8:

What I learned:

This illustration helped me develop skills in creating a complete scene with ornate environmental details, including an elaborate baroque mirror frame and furniture elements. I practiced rendering luxurious fabric textures with embellished trim, volumetric gown construction, and learned to balance multiple focal points while maintaining depth and perspective in a narrative composition

Project 9:

What I learnd:

This illustration taught me to capture natural body posture and movement while integrating a prop, developing my understanding of how fabric drapes over a seated figure. I practiced rendering realistic folds and shadows in flowing fabric, worked on foreshortening techniques for

the guitar and limbs, and enhanced my skills in creating a cohesive color palette with warm, harmonious tones.

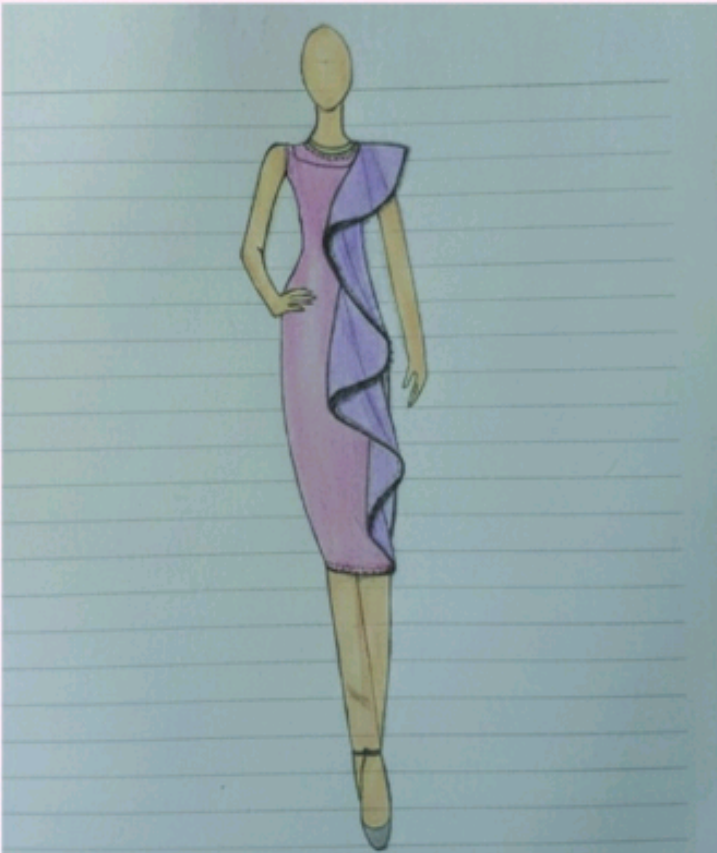

Project 10:

What I learnd:

This sketch taught me to create atmospheric storytelling through environmental elements like rain while depicting casual fashion with a soft color palette. I practiced rendering technical details like the umbrella's curved structure and the natural drape of a pleated skirt.

Project 11:

What I learned:

Developed skills in asymmetrical ruffles, color harmony, and how embellishments elevate fitted designs into statement pieces

Project 12:

What I learned:

This portrait refined my facial anatomy skills, shading techniques, and hair texture rendering while capturing realistic proportions and expressions

Project 13:

What I learnd:

This sketch developed my skills in capturing natural childhood poses, clothing folds, and body proportions while practicing shading and depth

Project 14:

What I learnd:

"This architectural sketch taught me perspective, symmetry, and Islamic arch details while practicing watercolor blending and creative composition

Project 15:

What I learnd:

This sketch refined my portrait skills with casual accessories, capturing facial angles, cap texture, and hoodie folds in a relaxed pose

Project 16:

What I learned:

This sketch taught me layered composition, perspective depth, and watercolor techniques while creating a peaceful narrative scene with natural elements

Project 17:

What I learned:

This sketch developed my skills in minimalist storytelling, delicate natural elements, and soft watercolor washes to create a serene atmosphere
